

How much will it really cost you?

Price isn't everything. Check the running costs before you buy an appliance.

Save energy, water and money

The more stars the more energy efficient

ENERGY RATING

A joint government and industry program
xxx dishwasher Model xxx

xxx times per week

Energy Rating Labels are an Australian Government requirement on new appliances, making it easy to compare running costs.

Appliances must meet strict criteria determined under Australian Standards before they can be granted an Energy Rating Label.

Low score saves more

The lower the energy consumption score, the less electricity the appliance uses, and the cheaper it will be to run.

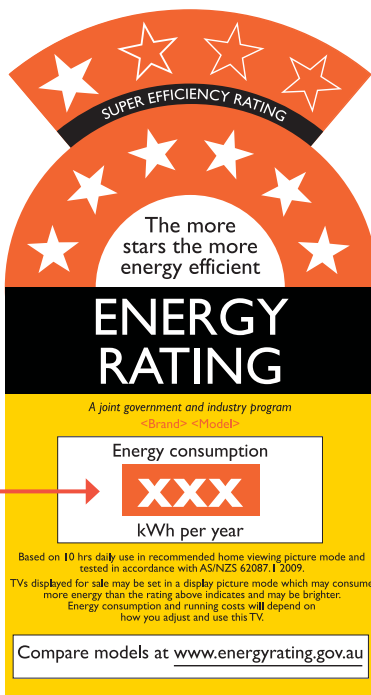

More stars, more savings

When comparing similar sized products, look for more stars and save money.

- › Dishwashers, washing machines & dryers are rated from one to six stars.

- › TVs, refrigerators/freezers & air conditioners are rated from one to ten stars.
